2022-2023 (Winter Semester)

Tasks Performed:

- We examined and studied the data thoroughly in order to better understand its various properties and how it can be classified. Through this process, we gained valuable insights into the nature of the data and how it can be utilized to inform decision-making and other important tasks. By analyzing the data in detail, we were able to identify patterns and trends that were not immediately apparent, which helped us to draw more accurate conclusions about the information at hand.

Due to ongoing mid-semester exams, we were unable to dedicate significant time and attention to the project.
